

SOFTWARE LICENSE & SERVICE AGREEMENT

Enterprise Hospital Management System (EHMS)

Agreement Date: _____

Agreement Reference No.: _____

1. PARTIES

This Agreement is entered into between:

Provider / Licensor	_____
Address	_____
Contact	_____

and

Client / Licensee	_____
Address	_____
Contact	_____

(collectively referred to as the “Parties”)

2. PURPOSE

The Provider grants the Client a license to use the **Enterprise Hospital Management System (EHMS)** — a web-based integrated platform for hospital operations, inventory control, multi-branch administration, user access control, and clinical workflows.

This document describes the **licensed modules and features** included under this Agreement.

3. SYSTEM OVERVIEW

EHMS is a multi-company, multi-branch system that supports:

- Centralized data per organization (company)
- Branch-level operations with user branch assignment
- Role-based access control and audit logging
- Integration between hospital services, billing, and inventory

4. LICENSED MODULES & FEATURES

4.1 Hospital Management

End-to-end clinical and front-office workflows for hospitals and clinics.

Area	Features Included
Reception	Patient registration with auto-generated MRN; patient search, view, and edit; insurance type assignment; visit creation with selectable visiting date (backdating); department routing; pre-billing via sales invoices; welcome SMS; patient deletion approval workflow
Cashier	Visit bill viewing; payment processing; bill clearance; waiting lists
Triage	Vital signs recording; patient routing to departments; queue management
Doctor	Consultations; diagnosis and treatment plans; prescriptions; ordering lab, ultrasound, audiology, dental, and pharmacy bills; viewing results
Laboratory (Lab)	Test queue (waiting / in service); results entry; result status (pending / ready); printing
Ultrasound	Examination queue; results entry and management; printing
Audiology	Hearing assessment queue; results entry and management; printing
Dental	Dental procedures and billing workflow
Pharmacy	Dispensing workflow; pharmacy bills linked to visits
RCH, Vaccination, Injection, Family Planning	Specialized department workflows as configured
Insurance	Configurable insurance types per company; receivable chart account per insurer; invoice payment by insurance (insurance receivable / trade receivable GL posting)

Area	Features Included
Sales integration	Pre-billing and service bills as sales invoices; payment methods: bank/cash, customer deposits, insurance; link from invoice to hospital visit/patient
Administration	Hospital departments setup; insurance types (Settings); operational dashboard with pending counts per module

4.2 Inventory Management

Stock and item control for medicines, consumables, equipment, and services used across the organization.

Area	Features Included
Items & categories	Product and service items; categories; item codes; units of measure; active/inactive status
Branch pricing	Default selling price per item; per-branch price overrides
Stock movements	Receipts, issues, adjustments; movement history per item and location
Transfers	Inter-location / inter-branch stock transfers; transfer requests with approve/reject
Write-offs	Stock write-off recording and tracking
Stock reports	Stock levels by location; stock reports and location views
Physical counts	Count periods and sessions; freeze, count, variance review; approve/reject count sessions
Opening balances	Inventory opening balance setup
Import	Bulk item import via template
Settings	Inventory accounts linkage; cost method configuration; inventory locations per branch
Integration	Items used on hospital pre-bills, pharmacy, and sales invoices

4.3 Branch Management

Operate multiple sites under one company with controlled access.

Area	Features Included
Branches	Create, edit, and deactivate branches; branch details and settings
Locations	Inventory/storage locations linked to branches
User assignment	Assign users to one or more branches
Session context	Users select active branch (change branch); operations scoped to current branch
Data scope	Patients, visits, stock, and transactions filtered by company and branch
Per-branch inventory	Stock and pricing managed per branch where applicable

4.4 User Management

Secure access and administration of system users.

Area	Features Included
Users	Create, edit, activate/deactivate users; user profiles and passwords
Roles	Role definitions with grouped permissions
Permissions	Granular permission control per module and action
Role assignment	Assign multiple roles per user
Branch assignment	Restrict user access to assigned branches
Menu access	Role-based menu visibility configuration
Company scope	Users operate within their assigned company
Audit	Activity logging on key records (where enabled)

5. OPTIONAL / EXTENDED MODULES & CONTINUOUS IMPROVEMENT

The System will continue to be improved in line with future requirements of the Client and evolving operational needs. Enhancements, new features, and additional modules may be delivered as part of ongoing development.

Fee arrangement for future development:

- Improvements that extend or refine **existing licensed modules** (Section 4) may be included **at the same fee** under the active maintenance or license agreement, where reasonably scoped.
- **New modules or major extensions** (e.g. accounting, HR & payroll, purchases, school/college, advanced reporting, or other capabilities not yet deployed) may be provided **at the same fee** where agreed in writing, or for a **small additional fee** according to the scope and effort of the developed module.

Any significant new module or change in scope will be confirmed in writing (email or addendum) before work begins, stating whether it is covered under the current agreement or subject to a supplementary charge.

Examples of modules that may be added over time include: accounting & general ledger, sales & invoicing, HR & payroll, purchases & suppliers, school/college modules, and reports & analytics.

6. DELIVERABLES

#	Deliverable	Description
1	Web application	Hosted or on-premise EHMS application access
2	User accounts	Initial administrator and agreed user seats
3	Configuration	Company, branches, roles, and base setup as per scope
4	Training	_____ sessions (optional — specify in annex)
5	Documentation	User-facing guides and this feature schedule

7. CLIENT RESPONSIBILITIES

The Client shall:

1. Provide accurate company, branch, and user information
2. Assign a system administrator for day-to-day user and role management
3. Ensure staff use individual accounts (no shared passwords)
4. Maintain internet connectivity and compatible browsers for web access

5. Back up business decisions on insurance types, chart accounts, and pricing configuration

8. SUPPORT & MAINTENANCE

Item	Terms
Support channel	_____ (email / phone / ticket)
Support hours	_____
Bug fixes	Included for licensed version during active subscription
Enhancements	Subject to separate quotation unless included in maintenance plan
Updates	Security and minor updates as released by Provider

9. FEES & PAYMENT

Item	Amount / Terms
License / implementation fee	_____
Annual maintenance (optional)	_____
Payment schedule	_____
Currency	_____

10. TERM & TERMINATION

Item	Terms
Initial term	_____ months / years from go-live date
Renewal	Automatic / manual renewal as agreed
Termination	_____ days written notice by either party (subject to outstanding fees)
Data on exit	Client data export available upon request within _____ days

11. CONFIDENTIALITY & DATA

1. Both Parties shall keep confidential any proprietary or patient-related information accessed through the system.
 2. The Client retains ownership of operational and patient data entered into EHMS.
 3. The Provider shall not use Client data for purposes other than delivering and supporting the licensed services.
-

12. LIMITATION OF LIABILITY

The Provider's liability under this Agreement is limited to the fees paid by the Client in the twelve (12) months preceding the claim, except where prohibited by applicable law. The system is provided as an operational tool; clinical decisions remain the responsibility of licensed healthcare professionals.

13. ACCEPTANCE

By signing below, the Parties agree to the terms of this Agreement and confirm that **Section 4 (Licensed Modules & Features)** accurately reflects the scope licensed to the Client.
